# Space Dogs

## A Decentralized Journey to the Stars

### Abstract

Get ready for liftoff! Welcome to Space Dogs, a community-driven project aiming to launch a satellite into space. Our mission is to create a fun and engaging experience for crypto enthusiasts while pushing the boundaries of space exploration. Inspired by the intrepid spirits of Laika and Belka, the first canine cosmonauts, Space Dogs aims to democratize space exploration and inspire a new generation of dreamers. Join us on this barking mad adventure as we explore the cosmos with the support of our loyal pack of Space Dogs holders.

### Vision

To become a leading force in decentralized space exploration, empowering communities to participate in groundbreaking celestial endeavours through the power of cryptocurrency.

### Mission

- Create a self-sustaining, multi-chain ecosystem: Leverage the strengths of both Solana and Ethereum for speed, security, and community reach.
- Partner with established satellite and rocket ride-share companies: Ensure technical expertise and cost-effectiveness for our mission.
- Launch a purpose-driven satellite: "WoofSat-1," carrying scientific instruments or creative artwork chosen by the community.
- Foster a vibrant community: Active engagement across both Solana and Ethereum communities through events, governance, and exclusive content.

### Roadmap

#### Phase 1: Early Engagement

- Increase presence on social media (Discord, Telegram and X)
- Initial token launch on both Solana and Ethereum!
- Social media to be used for exclusive access to community events and early access to further developments.
- Distribution: Public sale, team allocation, and marketing reserve.

#### Phase 2: Mission Control

- Expand reach through active community management on both token blockchains.
- Partner with established satellite and rocket ride-share companies.

- Design and develop the Space Dogs satellite (tentatively named WoofSat-1) with a specific purpose (e.g., space weather monitoring, educational imagery, or amateur radio relay).
- Finalize launch parameters and timeline.

### Phase 3: Liftoff and Beyond!

- Execute the WoofSat-1 launch.
- Stream the launch live and celebrate with the community.
- Continue growing the Space Dogs ecosystem and explore future space endeavors.

## Tokenomics

### Solana Hybrid Token Launch

#### Purpose

Community awareness and engagement. Hybrid token allows for interchange between NFT and fungible tokens. Utilise Bozo Finance launchpad to create the hybrid token – fair launch.

#### Supply

1 NFT equivalent to 1,000,000 tokens. Capped to 1,000 NFTs. Tradable to defi.

#### Mint

NFTs can be traded for tokens and vice versa. Each NFT cost to mint. Each NFT minted, a portion is placed into a liquidity pool for immediate trading.

### Ethereum Token Launch

#### Purpose

Primary mission funding. Access to a larger pool of traders on a competing blockchain.

#### Supply

ERC-20 token capped at 1,000,000,000. Token to utilise a 1% transaction tax. Tradable on Uniswap defi.

#### Tax and Allocation

50% - Satellite Development Pool: Funds dedicated to WoofSat-1 development, launch and maintenance.  
50% - Marketing and Development Pool: Supports a healthy token ecosystem and on-going project development.

## Satellite Purpose & Timeline

### Purpose

WoofSat-1 will be a small, low-orbit satellite serving a specific purpose chosen by the community. Potential options include:

- **Space Weather Monitoring:** Tracking solar flares and their impact on Earth's technology.
- **Educational Imagery:** Capturing unique views of Earth for educational purposes and inspiring students.
- **Amateur Radio Relay:** Extending communication range for ham radio enthusiasts worldwide.

The final purpose will be determined through community voting, ensuring all Space Dogs holders have a say in our journey to the stars.

### **Beyond the Stars**

Space Dogs is not just about one satellite. We aim to build a sustainable space exploration ecosystem on the Solana blockchain. Future plans include:

- Launching additional satellites with diverse purposes chosen by the community.
- Partnering with educational institutions and STEM programs to inspire future generations of space explorers.
- Developing decentralized applications (dApps) related to space exploration and data analysis.

### **Join the Pack!**

By holding Space Dog tokens, you become an integral part of the Space Dogs mission. Together, we can unlock the possibilities of decentralized space exploration and leave our paw prints on the universe.

### **Timeline**

Launch is estimated to occur within 12-18 months from the token launch date, depending on funding pool growth and partnership negotiations. Constant updates and transparency will be maintained throughout the process.

## **Team & Developers**

The Space Dogs team consists of experienced professionals in blockchain technology, aerospace engineering, marketing, and community management. Each team member is passionate about space exploration and committed to the project's success. Developers will be hired based on their expertise and alignment with the project's values.

## **Conclusion**

Space Dogs is more than just a crypto project; it's a community united by a passion for space exploration and the power of decentralization. With WoofSat-1 blazing the trail, we invite you to join us on this epic journey to the stars. Remember, when it comes to space, the sky's not the limit – it's just the beginning.
